

Consultation on guidelines on recommended standard licences, datasets and charging for the re-use of public sector information.

Background Information	
Please specify, which category of stakeholders you belong to. -multiple choices reply-(compulsory)	Re-use expert
Please provide your name, and where relevant the name of your organisation -open reply-(compulsory)	Communia Association
Please provide your e-mail address -open reply-(compulsory)	melanie.dulong@cnrs.fr
Please provide your country of residence / establishment -single choice reply-(compulsory)	Belgium
Recommended datasets	
Release with highest priority -single choice reply-(optional)	1
Release in a machine-readable format -single choice reply-(optional)	
Release in an interoperable format -single choice reply-(optional)	
Guarantee quality of datasets (regular updates, data accuracy) -single choice reply-(optional)	
Other (please refer to the question below) -single choice reply-(optional)	1
Please specify another consequence of characterising a dataset as a core one. -open reply-(optional)	Ensure datasets are in the public domain, by exempting them from copyright and database rights, or by mandating to waive rights with CC0
High value for commercial re-use -single choice reply-(optional)	1
High value for non-commercial re-use -single choice reply-(optional)	
Other (please specify in the open comment box below) -single choice reply-(optional)	1
Please specify other characteristics of a core dataset -open reply-(optional)	Transparency, social, scientific, educational and cultural value
Please indicate core datasets from the list below. For the purpose of this question core datasets are to be understood as those that should be released with highest priority, in machine-readable and	Other datasets to be considered as core datasets

interoperable formats because of their particular value for improving democracy and/or encouraging innovation. -multiple choices reply-(optional)	
Please specify -open reply-(optional)	
scientific, educational and cultural datasets	
Licensing	
Which option do you consider as preferable for re-use of public data in default cases? -single choice reply-(optional)	Other
Please specify -open reply-(optional)	exempt from copyright & database rights, make it public domain by default
The Commission favours the least restrictive re-use regime possible. Which of the following conditions would you consider as generally compliant with this feature? -multiple choices reply-(optional)	Every condition is restrictive
Are there any conditions that should be considered as 'black-listed' or 'hardcore' in default (non-exceptional) cases because particularly harmful to re-use? -single choice reply-(optional)	Yes
Please give example(s) -open reply-(optional)	Any condition discriminating use or user type
Are there any conditions that should be considered as 'black-listed' or 'hardcore' in exceptional re-use cases because particularly harmful to re-use? -single choice reply-(optional)	Yes
Please give example(s) -open reply-(optional)	Unreasonable requirements on attribution & alteration beyond source linking
Can any of the existing supranational (such as Creative Commons) or national licensing models be used as a basis for achieving interoperability at EU level? -single choice reply-(optional)	Yes
Please specify -single choice reply-(optional)	Creative Commons
Please specify the type of Creative Commons licence that you think would be suitable for PSI re-use. -open reply-(optional)	
CC0 Public Domain Dedication	
Is it justified to use different licences for commercial vs. non-commercial re-use? -single choice reply-(optional)	No

What are the necessary characteristics of an interoperable licence? -multiple choices reply-(optional)	Machine-readability - Common terminology - A limited number of allowed conditions - Common sets of conditions for specific datasets
Please indicate the terms that would require a harmonised definition -open reply-(optional)	
Are there any additional characteristics/issues to be addressed to ensure interoperability of licensing conditions? -single choice reply-(optional)	Yes
Please specify -open reply-(optional)	Single point national coordination for licenses or coordination at EU level
Charging	
Telecommunications costs -single choice reply-(optional)	no opinion
Customer service -single choice reply-(optional)	no opinion
Duplication -single choice reply-(optional)	no opinion
Software licensing -single choice reply-(optional)	no opinion
Database modification for dissemination -single choice reply-(optional)	no opinion
Hardware enhancements for dissemination (capacity, ports) -single choice reply-(optional)	no opinion
Value-added for dissemination (software enhancements, advertising) -single choice reply-(optional)	no opinion
Database development -single choice reply-(optional)	no opinion
Hardware -single choice reply-(optional)	no opinion
Data creation/collection -single choice reply-(optional)	no opinion
Data maintenance -single choice reply-(optional)	no opinion
Archiving -single choice reply-(optional)	no opinion
Other (please refer to the next question) -single choice reply-(optional)	no opinion
Please specify what other elements can be considered when calculating the marginal cost of reproduction, provision and dissemination? -open reply-(optional)	

Overhead costs -single choice reply-(optional)	no opinion
Non-incremental database development -single choice reply-(optional)	no opinion
Non-incremental hardware costs -single choice reply-(optional)	no opinion
Data maintenance -single choice reply-(optional)	no opinion
Other -single choice reply-(optional)	no opinion
Where full cost recovery is allowed under the Directive, what other elements can be included in the calculation of fees for re-use? -open reply-(optional)	
At what level should Public Sector Bodies calculate their charges for re-use? -single choice reply-(optional)	No opinion
In case of charges above marginal cost, what % above the fixed interest rate on the main refinancing operations set by the ECB (currently 0,5%) would you consider a reasonable return on investment? -single choice reply-(optional)	No opinion
With regard to libraries, museums and archives, what cost elements should be considered when calculating the cost of preservation and rights clearance? -open reply-(optional)	
Digital reproductions of works that are in the Public Domain must also belong to the Public Domain. Use of Public Domain works must not be limited	
Should public bodies publish their revenues from re-use? -single choice reply-(optional)	Yes
On what basis? -single choice reply-(optional)	Yearly
Additional comments	
Would you have any other comments or input that you wish to give regarding the guidelines? -open reply-(optional)	
More emphasis should be given to the interaction between PSI and: (a) copyright law (introduce PSI related exceptions instead of licensing) (b) cultural heritage laws (ensure they comply with PSI)
